

Biomass and Wood Fired Boilers

High Efficiency, low environmental emissions, and generous sizing are the trademark of Teaford Company wood fired boilers. These units are designed with multi-stage burners, and can be provided in the following sizes:

Field Erected Boilers to 300,000 PPH Steam Output

- Saturated or superheated steam
- High pressure designs
- Low pressure designs
- Tangent tube, tube and tile and membrane wall designs
- Wet and dry fuel systems
- Auxiliary gas or oil burners
- Low NOX emissions
- Superior designed super high efficiency systems

Package Boilers Up to 70,000 PPH Steam Output

- Compact low cost firetube designs
- Water tube designs for high pressure
- Combination watertube and firetube designs
- High pressure and low pressure designs
- Complete turnkey plants
