

Biomass and Wood Fired Thermal Oil Systems

The Teaford Company offers a wide variety of custom biomass and wood fired thermal oil heating systems to suit your particular fuel and budget.

Thermal Oil Heaters Up To 160 MMBtu/hr Output

- Radiant tube heaters in helical coil and rectangular configurations
- Combination radiant and convective heaters for low cost applications
- High efficiency with low stack temperatures
- Low emissions
- Energy efficient for low operating costs including fuel and electricity.

Auxiliary Equipment

- Complete oil circulation systems can be provided including all pumps and tanks.
- Fuel storage and handling systems.
- Dust free ash handling equipment.

Biomass and Wood Fired Thermal Oil Systems

Turnkey custom designed thermal oil systems are what separate us from the competition. We specialize in thermal oil tanks, pumps, and piping systems.

• ASME Coded Tanks

- Our shop is ASME coded with in house design team and ASME S,U, and R stamps
- From storage tanks and expansion tanks to thermal buffer vessels

• Thermal Oil Pump Skids

- Custom engineered pump skids with pumps, valves, strainers, bellows and piping to headers
- Shop assembled and aligned for high degree of accuracy and easier field installation

• Piping Systems

- We have the experience to provide complex but efficient thermal oil piping designs for all applications

• Field Installations

- We have experienced crews and quality equipment to install thermal oil piping in the field

• Quality Control

- Our in-house quality control team tests the equipment before leaving our shop
